

A A G T C G A G T C A

The image displays a sequence of ten nucleotide bases: A, A, G, T, C, G, A, G, T, C, A. Each base is rendered in a large, bold, sans-serif font and is color-coded: Adenine (A) is green, Guanine (G) is yellow, Thymine (T) is red, and Cytosine (C) is blue. Below the main sequence, a reflection of the bases is visible, creating a 3D effect. The reflection is inverted vertically and color-coded to match the original bases. The entire sequence is set against a plain white background.
