

G A G C T T T A A A C C C A A C

The image displays a sequence of 16 nucleotide bases: G, A, G, C, T, T, T, A, A, A, C, C, C, A, A, C. Each base is represented by a large, bold, colored letter. Below each base, a smaller, colored letter indicates its complementary base: C, T, C, G, A, A, A, C, C, G, G, G, T, T, G. The colors used are yellow for G, green for A, blue for C, and red for T. The complementary bases are positioned directly below their corresponding bases, with some overlapping the main base's structure.
