

G G A T G A C G T C A

The image displays a sequence of nucleotide bases: G, G, A, T, G, A, C, G, T, C, A. Below each base, its complementary base is shown: C, C, G, A, A, G, G, A, G, A, T. The bases are color-coded: G is yellow, A is green, T is red, and C is blue. The complementary bases are color-coded: C is blue, G is yellow, A is green, and T is red. The bases are arranged in a slightly staggered manner, with the complementary bases positioned directly below their corresponding base.
