

G A T T G C A T C A

The image displays a sequence of ten nucleotide bases: G, A, T, T, G, C, A, T, C, A. The bases are color-coded: G is yellow, A is green, and T is red. The sequence is presented in a 3D perspective, with the first two letters 'GA' and the final letter 'A' having distinct colored shadows (green, red, and blue) beneath them, suggesting they are floating above a surface. The remaining bases 'TTGCATC' are rendered in a flat, 2D style. The letters are bold and sans-serif.
