

T G A G T C A T C A G

The image displays a sequence of nucleotide bases: T, G, A, G, T, C, A, T, C, A, G. Each base is represented by a large, bold, colored letter. Below each letter is a smaller, semi-transparent version of its complementary base, connected by a thin line. The complementary bases are: G, C, T, A, G, C, A, G, C, T. The colors used are red for Thymine (T), yellow for Guanine (G), green for Adenine (A), blue for Cytosine (C), and orange for Guanine (G). The sequence is arranged in a slightly staggered, overlapping manner.
