

A G G A A G T G A G T C A C

A sequence of 12 nucleotide bases: A, G, G, A, A, G, T, G, A, G, T, C, A, C. The bases are color-coded: A is green, G is yellow, T is red, and C is blue. Each base is positioned above a corresponding colored ring. Below the main sequence, there is a reflection of the bases and rings, with the top half of the reflection appearing inverted.
