

AGGCAGGAAAG

A sequence of ten nucleotide bases: A, G, G, C, A, G, G, A, A, G. The bases are colored as follows: A is green, G is orange, and C is blue. Below the main sequence, there is a reflection effect consisting of smaller, semi-transparent versions of the bases in the same color scheme, creating a 3D-like appearance. The reflection is slightly offset and faded compared to the main text.
