

A A G A A T G T

The image displays a sequence of eight nucleotide bases: A, A, G, A, A, T, G, T. The bases are color-coded: Adenine (A) is green, Guanine (G) is yellow, Thymine (T) is red, and Cytosine (C) is blue. The C is positioned below the G. There are also small red and blue horizontal bars below the A and T bases respectively.
