

A A A G C C C A C A

The image displays a sequence of nucleotide bases: A A A G C C C A C A. The bases are color-coded: Adenine (A) is green, Guanine (G) is orange, and Cytosine (C) is blue. A red horizontal bar is positioned below the first 'A' in the sequence. A green horizontal bar is positioned below the 'G' in the sequence. The bases are arranged in a slightly staggered, overlapping manner.
